2. Collaborated with developers to optimize user interfaces for enhanced user experience across devices.
3. Gain hands-on experience in **debugging**, c**ross-browser compatibility**, and front-end optimization.

PROJECTS

Education Meeting:

The **Education Meeting** platform is designed to simplify employee training and onboarding for companies. Administrators can easily create courses, manage users, track progress, and ensure smooth learning experiences across all departments.

- Designed and developed a responsive front-end for a education meeting.
- Built using HTML, CSS, JavaScript, and React.
- Included live currency sections, interactive UI components, and a clean layout.
- Practiced real-time data handling and responsive design
- **Live Demo:** Education Meeting

House of Leather (E-commerce Store):

The House of Leather platform is designed to provide a seamless online shopping experience for **premium leather products**, including bags, **wallets**, **belts**, and **accessories**. The platform showcases high-quality, handcrafted leather goods with a focus on durability, elegance, and modern design.

- Designed and developed a responsive front-end for an **e-commerce store**.
- Built using **HTML**, **CSS**, **JavaScript**, and **React** to create aclean and **modern UI**.
- Implemented **product listing pages**, **category filtering**, and detailed product views for better user experience.
- Integrated dynamic **UI components** for product showcase, **cart interaction**, and **smooth navigation.**
- **Live Demo:** House of Leather

Zenith Boarding Platform (Admin Panel + User Portal):

The **Zenith Boarding platform** is designed to simplify property rental and accommodation management for students and professionals. Administrators can easily manage listings, users, bookings, and ensure a smooth experience across the platform through a separately deployed admin panel and user portal.

- Implemented secure **login/signup** functionality.
- Developed CRUD operations for tasks: **creation**, **updating**, and **deletion**.
- **Integrated RESTful APIs** for real-time **data handling**, **property listings**, **user management**, booking system, and dashboard functionalities.
- Practiced **API integration**, real-time **data handling**, and responsive design.
- **Live Demo:**Zenith Boarding Platform
- **Live Demo:**Admin Panel
